

Collaborated with interprofessional teams to promote patient safety and quality care

Competency Mapping	Details
AACN Essentials	Domain 6: Interprofessional Partnerships; Domain 5: Quality and Safety
NONPF Competency	NP Domain 6: Interprofessional Collaboration in Practice; NP Domain 5: Quality and Safety
QSEN Competency	Teamwork and Collaboration; Safety; Evidence-Based Practice
Program Goal	Engage in leadership, scholarship, and change-agent activities that promote collaboration and communication among interdisciplinary team members
Artifacts	1. MSN 580 Week 4 Discussion addressing interprofessional conflict resolution strategies 2. MSN 597 Dual-Diagnosis Care Plan incorporating explicit roles for psychiatrist, therapist, social worker, case manager, and community resources 3. MSN 650 Capstone telehealth model requiring coordinated implementation across nursing, advanced practice, information technology, administration, and custody staff 4. Clinical practicum experiences totaling 810 hours involving real-time collaboration with psychiatrists, therapists, primary care providers, nursing staff, and custody teams
Self-Assessment	Prior leadership experience as Director of Nursing, combined with graduate clinical training, has produced reliable interprofessional collaboration skills. Roles are clarified, communication across disciplines is prioritized, and patient safety remains the central organizing principle in complex care environments.
Plans for Further Development	Formal leadership of interprofessional case conferences will be strengthened, and experience with primary care-behavioral health integration models will be expanded following certification.
